

Journey to consciousness the Anunnaki Arrivals of Paradise history :

There is a lot of ambiguity surrounding the world around us, such mysteries which makes us wonder about the ancient civilizations and why we received little information in schools about the first ancient civilizations in the world, especially when these civilizations have offered the most things that are still used by humanity. Many people may know the ancient Egyptian civilization but few people know about the Sumerian civilization, although they left evidence on the first recorded record . The ancient Sumerian civilization is one of the oldest civilizations in the world. It surpassed the Pharaonic civilization in History. This civilization which most people don't know defined the solar system, the shape of the earth, the division of the circle to 360 degrees, and divides the day into 86,400 seconds to 24 hours. The planets and the direction of their paths. For example, the planet Uranus was discovered only in 1782 and Neptune in 1846 and Pluto in 1930, So how did they know of the existence of planets without using any astronomical instruments, this question how, is remained unanswered today .so you can connect the dots and you will find that this omission may be intentional .

If we return to the source to the first recorded history that In 1849, British archaeologists unearthed 14 stone tablets written in the Sumerian language in Iraq. Today, it is the oldest known literature dating back to the 14th century BC. Some writings are similar to the other known writings, but with a new flow on the ancient sacred texts . While these writings refer to a variety of nominal beings came from Outer Space somewhere in the universe that explains in the first and second tablets, which describe them, and where they came from, and why they come to earth

According to the Sumerian plates 445,000 years ago, the Anunnaki, whose name means royal strain or royal blood. And they came to earth, which was occupied only by animals and cavemen (primitive humans). They inhabited a planet called Nibirua, which enters our solar system once every 3600 years. According to the texts, the Anunnaki lived for many centuries and were described as giants compared to humans, have beamy eyes and carrying shields.

According to the panels, the planet Nibirua entered our solar system and settled between Mars and the earth, where they call it the earth brother and where he fled in what is now known as iron oxide, which makes the rivers and lakes appear red, the atmosphere of Nibirua began to deteriorate and became an unfit place for living, so they decided to go to Earth .

When the Anunnaki arrived at earth they were able to live a lifespan of hundreds of thousands of years. The Sumerian plates, after they landed in Aurdog, now known in the Arabian Gulf region, they did not arrive alone. They brought with them another being called Iggye, They served Anunnaki by extracting gold. After a certain period of time in the land, the Iggye being want to rebellion against the Anunnaki, but they didn't possess the strength to defeat them, which led to the Anunnaki eliminate them all. Leaving the Anunnaki without a workforce, and therefore began tests and studies to create a new being, using what is known today as genetic engineering, a being that capable of doing the work. The Anunnaki experiments are detailed in Sumerian plates to create many unique beings .

The Anunnaki finally succeeds in achieving the goal of acquiring a new being, through the fertilization of the sperm of the Anunnaki and the eggs of ancient cavemen, a new being has emerged, the modern man.

The modern man received instruction in the social, academic and technological skills by the Anunnaki, so they can become better slaves to them. All of this was explained in the stone tablets. Modern man was sterile but with increasing demand for manpower, they were redesigned to obtain the ability to conceive and reproduce. After the passage of time and the increasing intelligence of modern man and with the number of people growing rapidly, causing the Anunnaki to kill or remove some of the people from their cities.

After some time Nibiru's orbit caused chaos in the sun and Earth , that led to geographical and natural changes In the atmosphere of the earth. The Sumerian plates describe one catastrophic event that occurred when Nibirua approached the earth and recalling the appearance of black spots on the surface of the sun. The magnetic field became folds and the temperature rose until the ice caps began to melt. This incident is known

by the Great Flood, which is mentioned in the plates of the Gilgamesh epic over 2000 years ago. The writing of the Torahs, known in all the heavenly religions, as the story of Noah's Ark.

A few years before the disaster, the Anunnaki Knew what about to happen, they want to return to their planet Nibirua and considered it an opportunity to get rid of some humans. But some Anunnaki chose to stay on the ground. The plates say that there was darkness in the day, the earth was shaking from an unknown power, a sound of the thunder breach the ground . The water hit the southern Glacier peaks causing it to fell, resulting in waves and tsunamis everywhere to submerge the cities built by the Anunnaki .The flooding continued for seven days until it last stopped, but heavy rain lasted for 40 days .

After the flood, they began the process of construction again . The text of the panels describes how the Anunnaki made their buildings according to the location of the stars, Anunnaki had reached their influence to every corner of the world has given the world Sumerian civilization . Anunnaki left the flag of the modern human ways of living and social classes and established the system of kings . And with their plant returning to normal they decide to leave the earth .

The Sumerian plates indicate that the planet Nibirua may come closer to the earth and the Anunnaki will return in their former to rule over the people , this may explain the secrecy about Sumerian recorded history. Finally, note the approaching 3600 years period maybe is nearing to completion, someday of which the Anunnaki will return to Earth maybe even during our lives.

Some scientists believe that the Iraqi faith bears clear signs of the Anunnaki people and their impact is found in the rest of the religions. This confirms that they will be eventually back to earth, inevitably to see what they have done. While some scientists doubt any discovery of sufficient evidence in the near future both on earth or on Mars. Other scientific community raised a state of wonder and astonishment after the debate over the true nature of the Anunnaki intensified. Scientists announced a new opinion on the Sumerian mud tablets and it was a historical and religious monument of the Sumerian civilization and in

another translation that the Sumerians did not witness another race.
Creation The story of the Anunnaki simulates the descent of Adam, the Devil and the rest of his followers from the so-called Fallen Angels who have been expelled from heaven. By the same logic, we have previously written that the Anunnaki are fallen, angels .

Some believe that the atmosphere of Nibirua appeared to deteriorate, so they come to earth looking to ways to rescue their planet, and they discover that nanoparticles of gold can be used to repair damaged ozone on their planet. which they did succeed and revive their planet .

But to erase the doubt definitively some discovered facts that confirm the authenticity of an Anunnaki . Some interesting facts there is evidence that gold nanoparticles can be used to repair damaged ozone. It protects against radiation, which explains NASA's use of gold chips in its space stations. Everyone knows there are 8 planets in the solar system. But there were many theories about the oscillating orbit of planets To a potential gravity force into a large mass that has not been discovered yet . And in 2017 NASA published an article in which 5 other indications of the existence of the ninth planet in the group
